

Paper Web Grinding Machine Model Sd 3

for grinding or skiving of narrow paper reels

One edge of the paper web is bevelled from above the other from below, giving a stepless smooth spiral seam on the outside of the tube.

The machine is equipped with:

- Paper reel unwinding station
- Rollers for web transportation with guaranteed continuous speed of flow-through. Changes in the reels diameter are recognized by the control in order to adjust speed of transportation.
- 2 station grinding device (left, right)
- Re-winding station
- Re- and unwinding devices controlled by converters

Technical Data:

Output up to	appr	60 m/min
Width of paper reel	appr	70 - 320 mm
Diameter of paper reels re- and unwinding station	appr	1.200 mm
Width of grinding	appr	30 mm
Electrical Installation		400 Volt, 50 Hz 3-phase current with N and PE

Goffering Rollers (1 set)

200 mm width

Vacuum Dust Collection

(incl. complete additional equipment
as filters, tubes, dust collectors etc.)
